

## Dentsply Sirona presents SureSmile® Aligner Software upgrades for an enhanced user experience

**Treatment planning with SureSmile has never been so easy with a suite of updates to enhance the SureSmile Aligner user experience. SureSmile Aligner Software will enable greater efficiency through a streamlined patient overview, an intuitive user interface, and treatment planning tools to optimize workflow management.**

**Charlotte, NC/ Bensheim, October 28, 2021.** Dentsply Sirona announced a series of updates to its SureSmile Aligner Software that roll out in October and further enhance the overall user experience and interface. In addition, the company also revealed the planned integration of SureSmile® VPro™, an at-home High Frequency Vibration (HFV) technology device, to the SureSmile workflow later this year.

### **SureSmile Aligner Software—Redefining the user experience**

SureSmile Aligner Software is designed with the user experience in mind. Updated treatment planning tools, including an enhanced view of models and streamlined patient management screen, make it easier for doctors on the SureSmile Aligner Platform to view key information, while a simplified and streamlined prescription process enables them to work more efficiently.

The software update also gives users a new dental examination process: A 2D color model of the upper and lower dental arch. Missing teeth, fixed teeth or teeth to be extracted are easily identified using the model.

The tooth movement icon opens the free-floating window with the tabs for displacements, elastics and measurements. The patient summary screen makes it easy to view important information such as the case's full expiration date, dental exam and prescription details.

Finally, communication with the SureSmile Digital Lab is facilitated through a streamlined and simplified prescription process.

"In my experience, the ease of the SureSmile Aligner System drives better practice profitability, more predictable outcomes and happier patients, in part because fewer refinements are needed compared to other brands. I look forward to leveraging these latest enhancements in my practice to make treatment planning even easier with software that simply works like we do as dentists," said Dr. Shivi Gupta, a dentist from San Diego, CA, about her experience with SureSmile Aligner.

SureSmile's aligner workflow is simple and efficient and can be integrated into almost any practice. The intuitive and easy-to-use Aligner software offers a higher level of flexibility with diagnosis and treatment planning, supporting improved patient compliance and satisfaction.
